

JURISDICTION REQUEST LETTER

- 1. Letter dated June 27, 2009, submitted by Stanton Bird Club**

June 27, 2009

Me. Department of Environmental Protection
17 State House Station
Augusta, Maine 04333
c/o Kristen Chamberlain

Re: CMP /MPRP.

As an affected abutter and concerned land conservation group we are respectfully requesting intervenor status in the filings of Central Maine Power Co. as regards the MPRP and the new right of way to be constructed in the Litchfield, Monmouth area.

We have been granted intervenor status by the PUC in their hearings and have followed the progress of those proceedings with great interest. We have testified at the technical conference and would anticipate testifying at your hearings as well. We have been the stewards of the Woodbury Sanctuary for over 80 years and the proposed "Tacoma Lakes Solution" will devastate more than 10% of our existing sanctuary.

Additionally we request the hearings be transferred to the Board of Environmental Protection for action to assure the public that every aspect of the filing is fully vetted in open public hearings. We are not the only conservation group being negatively affected by this new power corridor. We trust that our position with respect to the protection of wildlife habitat and stewardship of the forest will be seriously considered in any findings issued by the board.

Please add us to the master mailing list for this process. Also please add my email to the electronic distribution list. Thank you.
